Project Title: Albert Camus Website

I'd like this to be built as multiple pages. Individual pages can focus on Camus' written books, a short history, and some information on his views.

- **Home Page / Introduction** - introduce who he is, and what he is generally known for.
- **Early life, Personal life** - a history of his personal life, highlighting the time period and the general events going on at that time.
- **Publications** - images and links to books
- **Philosophical views** - an overview of his general philosophical views and what people know him for.
- **Sources** - sources for images and information
